

Dry Slope Technologies

**CONSULTING
PLANNING
FITTING**

For more than 35 years, we have been working in the leisure industry. Together with our Skitrax® mats and other equipment, we have been able to plan and implement together with our customers dry slope ski areas, water jumps, tubing tracks, lifter zones and ice karting tracks. For the implementation there are many points to consider. It is also important whether the system should only be operated in summer or in winter.

We will accompany you until the opening of the facility. Call us or send an e-mail with your wishes. We are looking forward to your contact.

ANALYZING TERRAIN

We analyze the potential of the terrain to make the perfect choice regarding the terrain, topographical details, necessary soil movements or drainages.

MATERIAL SELECTION

Recommendations for the right choice of mats and the scope of the order. Necessary equipment e.g. Ski lifts, safety pads, ski rental, ski boots, ski poles, obstacles, clothing, ramps, tubing tires etc.

CUSTOMER

We gather the target groups with customer potential and detailed utilization time, price structure and potential revenue per season.

EMPLOYEE

Optimal employee structure and necessary training. Conduct training of employees. Presentations, necessary marketing measures with advertising plans. Professional Ski-instructor recruit, trainee and teaching.

COST FINDING

We analyze the individual facility with customer recommendations for capital costs, working expenses and potential earnings from e. g. ski slopes, slope style parks, tubing tracks, water ramps, half pipes.

LONG EXPERIENCES

We have more than 35 years worth of experience in the recreational industry and project planning. We offer to supervise the whole construction from the start and thus make it a success.
